SUMMARY

Software Engineer with 1+ year of professional experience building web, mobile, backend, and AI-powered applications. Strong in TypeScript, JavaScript, React, Node.js, and NestJS, with hands-on experience building LLM and Agentic AI applications using LangChain and LangGraph. Experienced in taking products from design and development to deployment with strong end-to-end ownership.

WORK EXPERIENCE

FULL STACK DEVELOPER

AgileTribers – Community-driven, AI-powered solutions

- Joined through college placement as an intern and transitioned to Software Engineer after internship.
- Built and shipped full-stack web and mobile applications using modern TypeScript technologies.
- Took product ownership end-to-end, from Figma-based UI/UX to deployment and production support.
- Developed AI-powered applications and agentic workflows using Vercel AI SDK, LangChain, and LangGraph.
- Worked across multiple products and stacks, solving production issues and adopted new technologies.

KEY PROJECTS

My Local Image (Personal Project)

- Built a privacy-first image tool for compression, conversion, resizing, enhancement, and cropping.
- Developed image processing with Rust + WebAssembly, keeping files entirely in the browser.
- Independently designed, developed, and deployed the product, reaching 1,000+ users.

Enterprise AI Coding IDE

- Worked on modern Agentic AI software for intelligent software development workflows.
- Developed AI workflows using LangChain and LangGraph for planning, execution and verification.
- Focused on design-system-aware code generation, context management and tool integration.

AI-Powered Job Discovery Platform

- Built an AI-powered job discovery platform to help placement officers find relevant opportunities for students.
- Automated keyword-based job discovery and daily tracking across opportunities.
- Developed backend workflows and data processing end-to-end.

Tier-2 Ride-Sharing Platform

- Worked across backend, admin web, driver, and user apps, fixing production bugs and implementing features.
- Improved GPS accuracy and location filtering, reducing noise for reliable distance and fare calculations.
- Implemented batch and local-first storage to prevent data loss during poor networks and maintain accurate fares.

Leading Indian Financial Services Company – Enterprise Insurance Platform

- Developed frontend applications for a large-scale enterprise insurance platform.
- Built a React design system from scratch based on the company's Figma UI kit, creating reusable components.
- Ensured consistent UI and reusable patterns across the application.

Skills

Languages: JavaScript, TypeScript, Rust

Frontend: React, Next.js, React Native, Redux, Zustand, TanStack Query, TanStack Table, Tailwind CSS, shadcn/ui

Backend: Node.js, Express.js, NestJS, GraphQL, tRPC, oRPC, Redis, Swagger

Database & ORM: SQL, NoSQL, Prisma, Drizzle ORM

Authentication: Passport.js, Better Auth, NextAuth.js

AI / LLM: Vercel AI SDK, LangChain, LangGraph

Tools & Platforms: Figma, Git, GitHub, VS Code, Postman, SSH, Docker, Linux, Vercel, Firebase, Google Play Console

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

M.E.T Engineering College | 2021 - 2025
